WHAT ABOUT SMALL TOWNS AND SUBURBS?

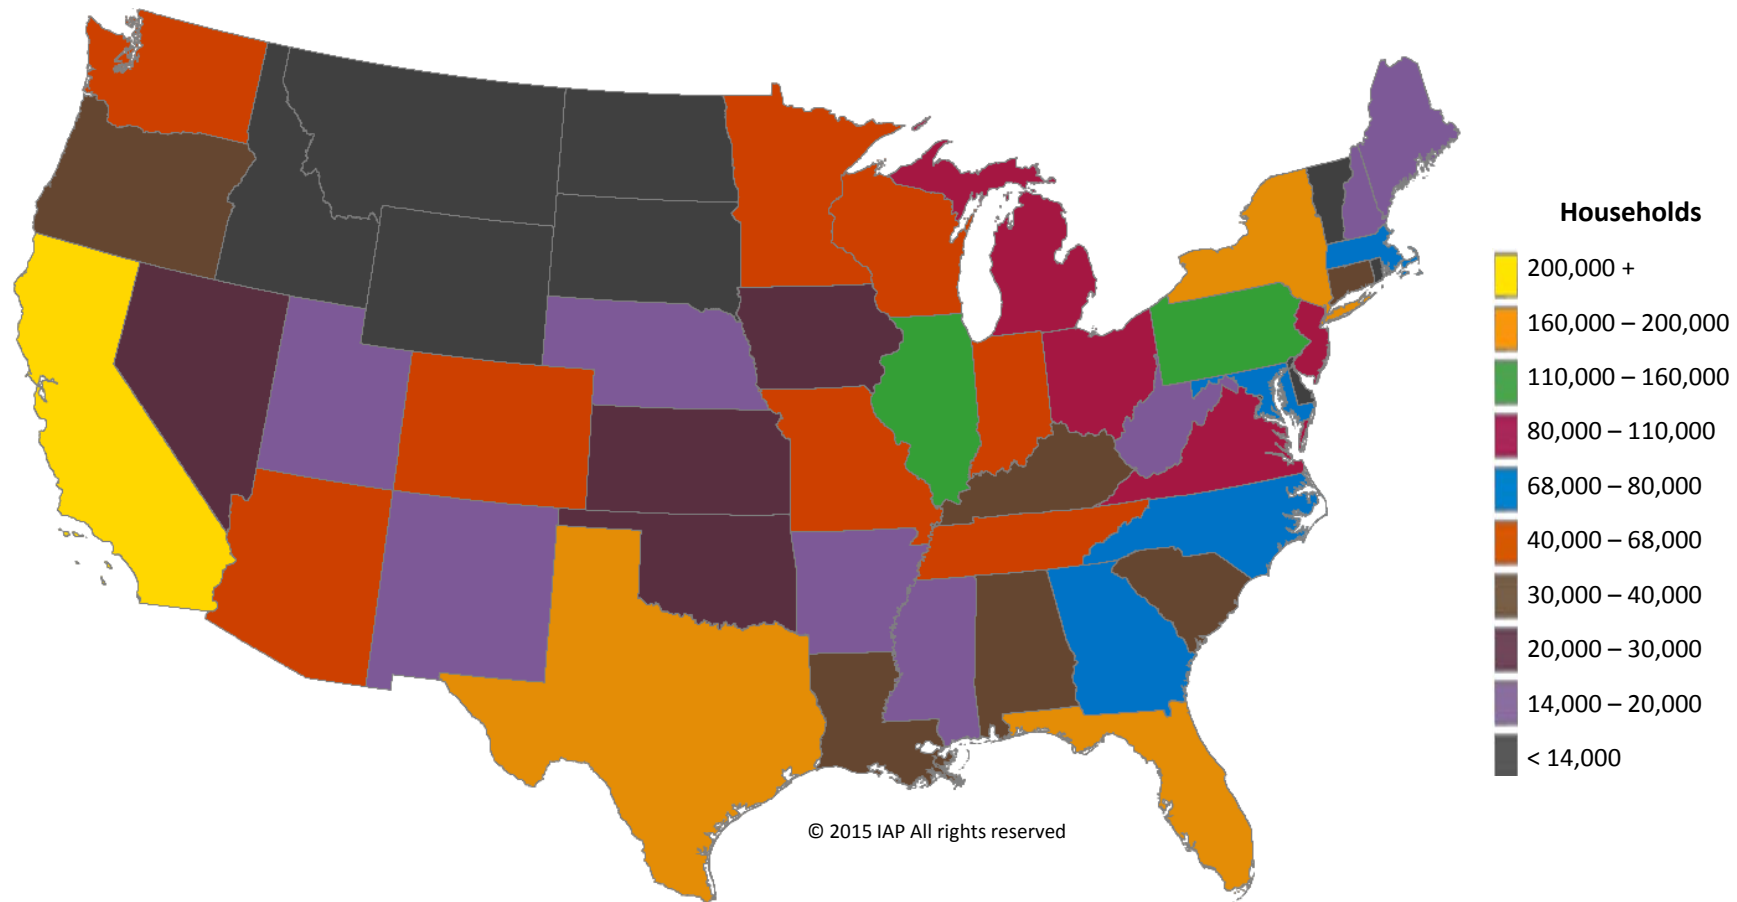

TOP TOWNS WITH 20,000-30,000 HOUSEHOLDS THAT ARE GOOD ANNUITY MARKETS

Northeast	Southeast	Midwest	West
Bensalem, PA	Aiken, SC	Algonquin, IL	Aliso Viejo, CA
Clarkstown, NY	Bedford, TX	Jefferson City, MO	Broomfield, CO
Milford, CT	Bowie, MD	Minnetonka, MN	Catalina Foothills, AZ
Union, NJ	Dunwoody, GA	St. Clair Shores, MI	Coeur d'Alene, ID
Weymouth, MA	Pensacola, FL	Warren, OH	Shoreline, WA

Above towns all have about 20,000-30,000 households and were selected based on:

1. High concentration of annuity market: Above average percentage of households "look like recent annuity buyers"
2. Select one town from a larger state within each region

CURRENT ANNUITY MARKET

Over 2.7 million households have characteristics similar to households that recently bought annuities. They represent the current annuity market. Within these households, there are 4-5 million individuals that the annuity industry has as its audience and prospective clients.

60% OF THE HIGHEST POTENTIAL ZIP CODES ARE **NOT** IN THE TOP 10 STATES

CONCENTRATIONS OF ADVISOR ANNUITY OPPORTUNITY ARE WIDELY DISTRIBUTED

Large metros and states may dominate, but today's annuity production potential is widely distributed geographically

Reversing the market concentration trend, TOP 10 STATES' share of the highest annuity market potential ZIP codes trends well below the share of the total annuity market households

Top 10 states such as NJ and FL have lower shares of the best market ZIP codes, but have high numbers of ZIP code-level markets that are somewhat lower potential that propel them to the top of rankings (Exam grade analogy: Fewer "As" but more "Bs" than other states)

Today's Retail Annuity Market Is Highly Concentrated

22% of US ZIP codes

Represent 70% of the households in today's annuity market

Advisors' best market:

7000 ZIP US codes

TAKEAWAYS

ADVISOR ANNUITY MARKET OPPORTUNITY IS GEOGRAPHICALLY CONCENTRATED AT ALL LEVELS

MAKE YOUR MARKET'S CHARACTERISTICS WORK FOR YOUR PRACTICE

Takeaway	Comment
To capture new-to-market prospects and referrals, working, pre-retired clients well before their 60s are a key segment	Over half of annuity owners are still working and the majority of households retire in place
Make the most of your market: Expect most production to be generated from a few local areas, with most of your market generating moderate-to-average results. Map marketing resources to market potential to improve profitability.	70% of today's likely annuity buyers are in 22% of the ZIP codes. The next 22% of the buyers are in 21% of ZIP codes; The remaining 8% of likely buyers are spread throughout 57% of ZIP codes.
Identify the best markets for your practice and refine marketing approach until results are achieved	If successful in the best markets production is more likely to be high <u>and</u> more profitable
Current annuity market potential can trump pure market size	Just as Austin outranks the larger San Antonio metro, the same dynamics occur within states, across metro areas, and within advisor markets
Use your local market knowledge to compete and identify new annuity prospects entering your annuity market	For example, if a moderate income condo complex is built in a local "not hot" ZIP code it will attract younger AND pre-retired families that have downsized and have assets
If expanding or buying a practice, evaluating the current annuity market and the target practice's position are key	Reduce time and resources needed to build production; Buy the right practice at the right price

ABOUT INFORMATION ASSET PARTNERS AND THE ANALYTICS

About IAP	IAP develops retail market analytics that improve market insight, targeting, and marketing performance. We focus on both direct and advisor-sold products. Solutions are designed to provide objective, specific metrics that readily integrate with existing market analytics to support all phases of the client’s institutional and retail marketing programs.
The Analytics	IAP’s Empirics metric for annuity buying was used in the analysis. Empirics is designed to measure specific, current market potentials – e.g., how many households are likely to buy a product or switch their financial advisor - and target geographically, enabling applications in institutional and retail marketing. Empirics metrics are available for specific products, financial behaviors, and wealth. Visit our site for more information: www.iapartners.com
Annuity & Life Insurance Market Potentials Reports Available	For annuity and life insurance marketers, summary regional and national metropolitan area reports are available for purchase on our site. For each metro, market size, rank, growth rate, and annuity market dynamics are provided. Solutions that integrate client and third party data, and custom localized reporting for advisors and branches are available.
